More about us:

Our name conveys that we strive to be a “spring of life” to homeowners, sub-contractors, employees, and their families through prioritizing personal connection. Over the years, Wellspring has been dedicated to remodeling with quality and transparency by providing excellent customer service and superior work.

About Our Process:

Site Visit: Our first scheduled visit will be to introduce ourselves and investigate the vision you have for your project.

Preliminary Estimate: We want you to have a clear understanding of the price range for your project before we get started. If you are further along in planning your project when you reach out to us, you can expect a more accurate estimate at this stage. If there’s still a lot of details to iron out, we will give you more of a ballpark number.

Pre-Construction and Design: Our designer will work closely with you through an in-depth process. The design fee is typically 2-5% of the total project price.

Final Estimate and Permitting: Once the design and floor plans are approved, we will make any needed adjustments to our preliminary estimate. After you approve the estimate, we will file for the permit and schedule the job.

Construction: Once permits are approved, construction will begin. We will communicate with you and provide a schedule in advance so you know what to expect.
